EXPLANATION OF STATISTICS

Security Restrictons: Commodity groupings which include Special Category shipments, if any, are identified with an asterisk (*). For the asterisked commodities, vessel and air totals do not include Special Category shipments although such shipments are included in the "all methods" totals.

Estimated Shipments and Shipments Valued $10,000 and Under: Effective January 1985, export statistics are fully compiled on shipments valued over $1,000 to all countries. Value data for shipments valued under $1,001 are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals. Estimated data for shipments valued under $1,001 are included only in the Schedule E section 9 (division 99, group 990 and subgroup 990.0) totals shown in export reports.

Effective January 1984 statistics, data for merchandise valued $10,000 and under which were not reported with a valid export commodity classification are included only in Schedule E section 9 (division 99, group 990 and subgroup 990.0) totals.

Foreign Trade Zone (FTZ) Data: Beginning with the processng of the July 1982 statistics, the export coverage was expanded to include data on the movement of merchandise out of U.S. Foreign Trade Zones.

Other: For detailed information on coverage, valuation, nonmonetary gold shipments, estimating procedures, sources of error in the data, security restrictions, and related matters, see the "Explanation of Statistics" section of Report FT410 and/or the Guide to Foreign Trade Statistics."

Symbols: X—Not applicable. Z—Less than half of the unit of measurement shown.

guide to foreign trade statistics: 1983

Exports...imports...whatever you wish to know concerning foreign trade – the "Guide" offers you the most convenient way to find the facts. The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of thousands of facts relating to imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and a variety of reasons for requiring information on foreign trade. The "Guide to Foreign Trade Statistics" includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations, magnetic tapes, and microfiche offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1983.

Make your work or study easy ...fast...and accurate! Use the "Guide to Foreign Trade Statistics: 1983"
